# ascertra.

Information powers progress

Ascertra software ensures teams have reliable information and documents to design, construct, and operate complex assets.

Building on a proud heritage of document control & collaboration solutions

Recognizing overlapping and complementary aspects in our products and expert services, Coreworx and Proarc have combined the best of both to create a more powerful presence: Ascertra. Merging these two industry-leading organizations brings together 40 years of combined expertise in successfully helping companies execute projects and operations through software that drives sound information management practices.
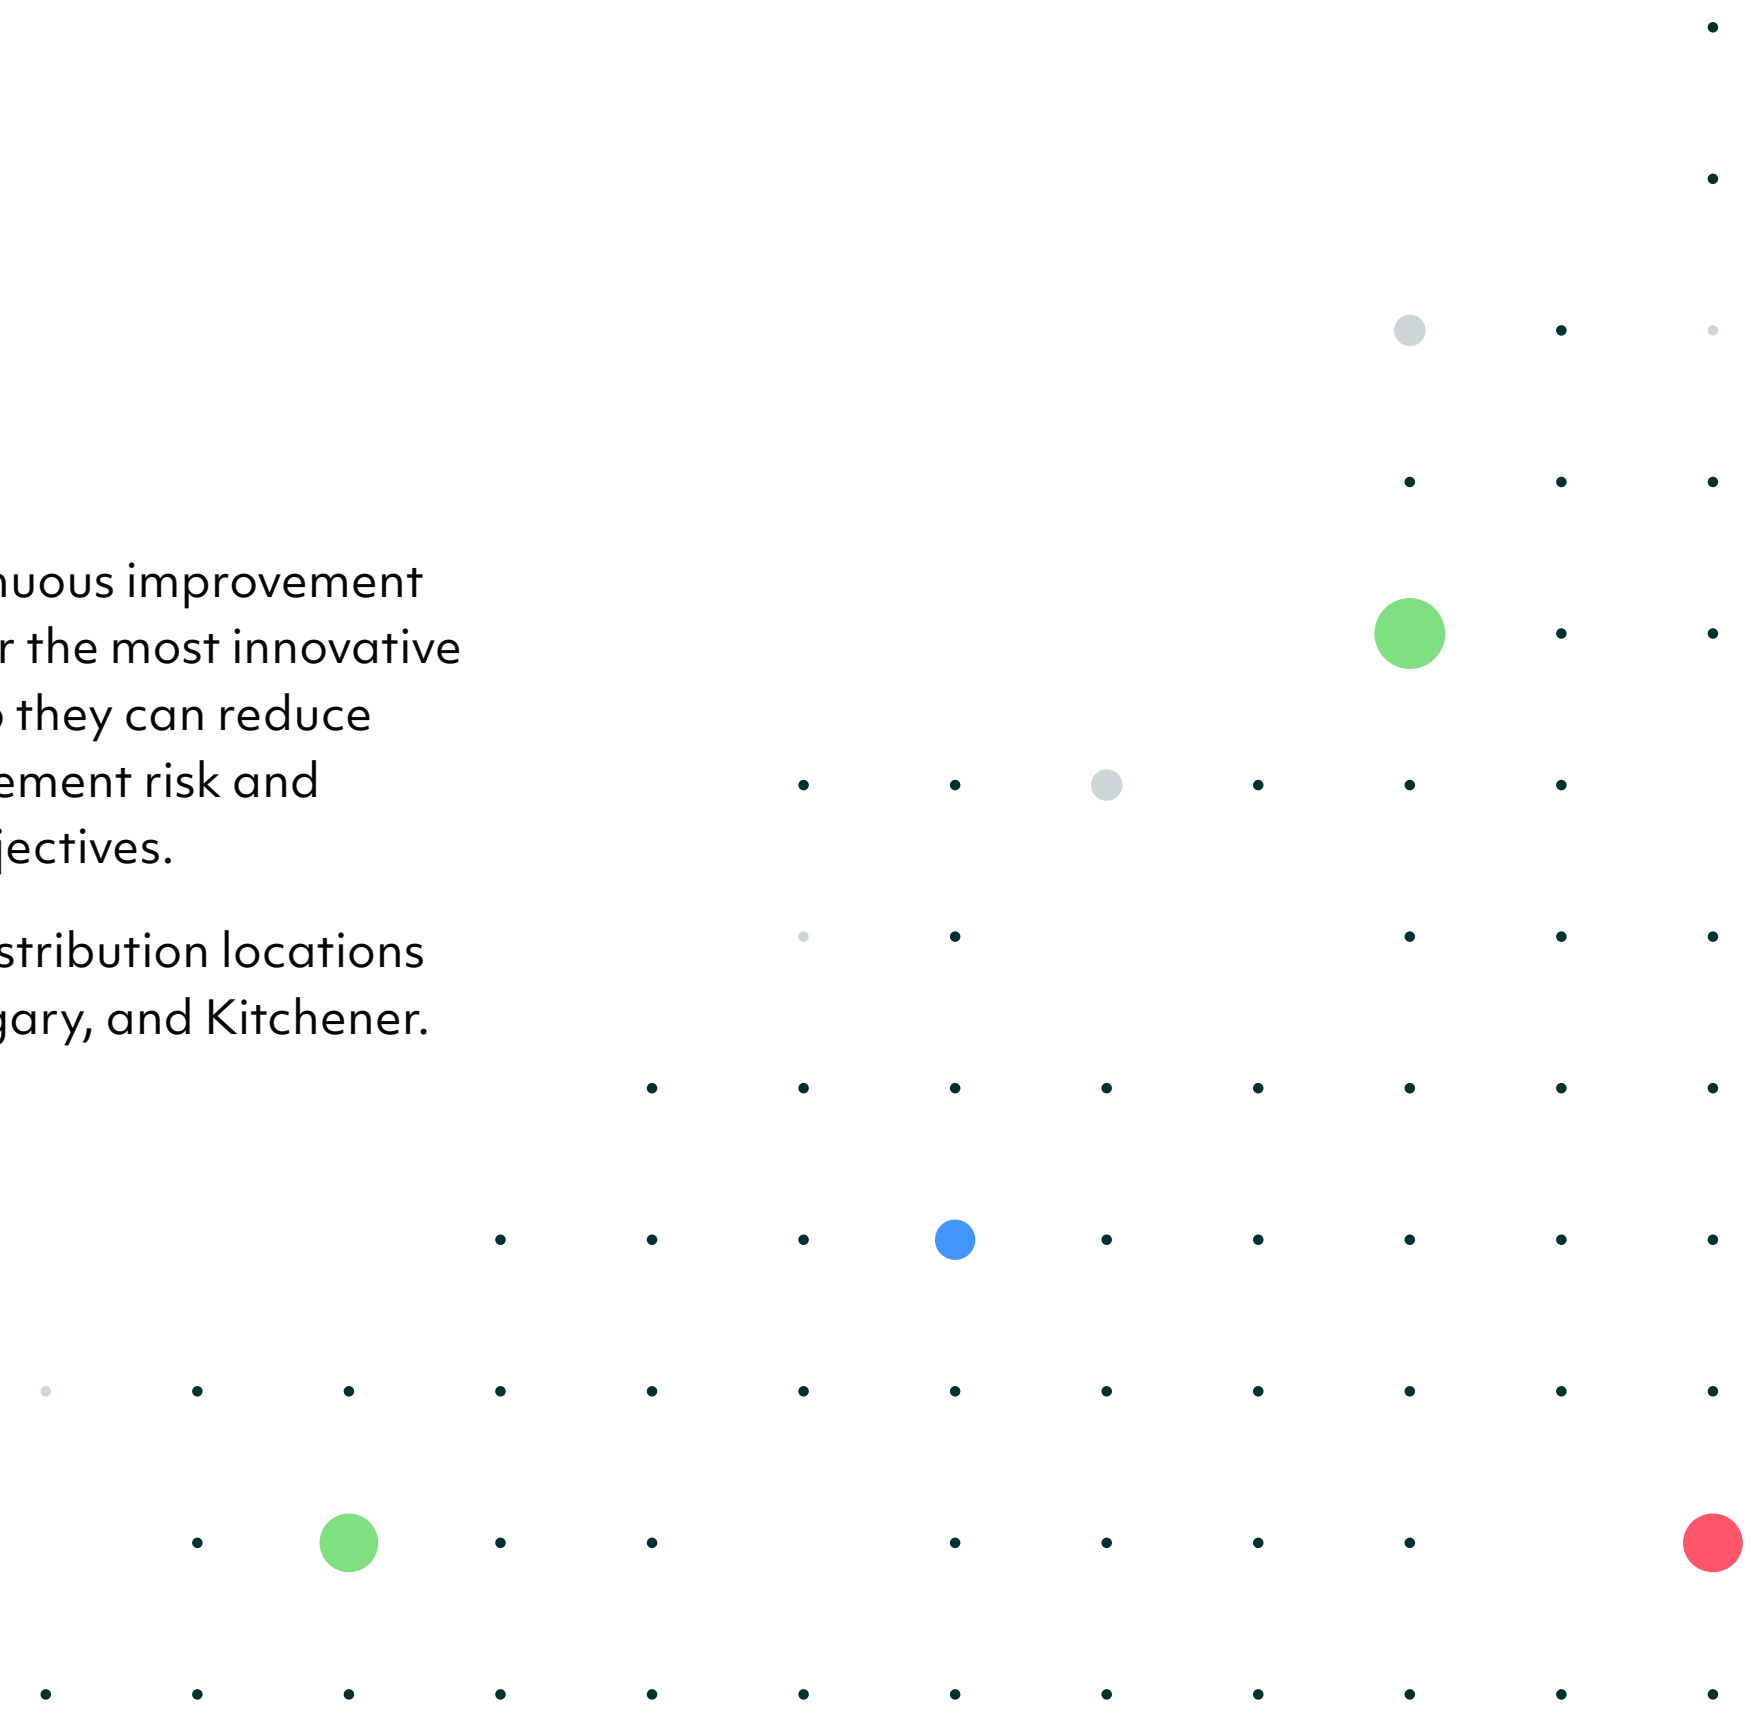

Originally developed for highly regulated offshore oil and gas infrastructure projects in the North Sea, Ascertra software solutions are proven to meet the demanding requirements
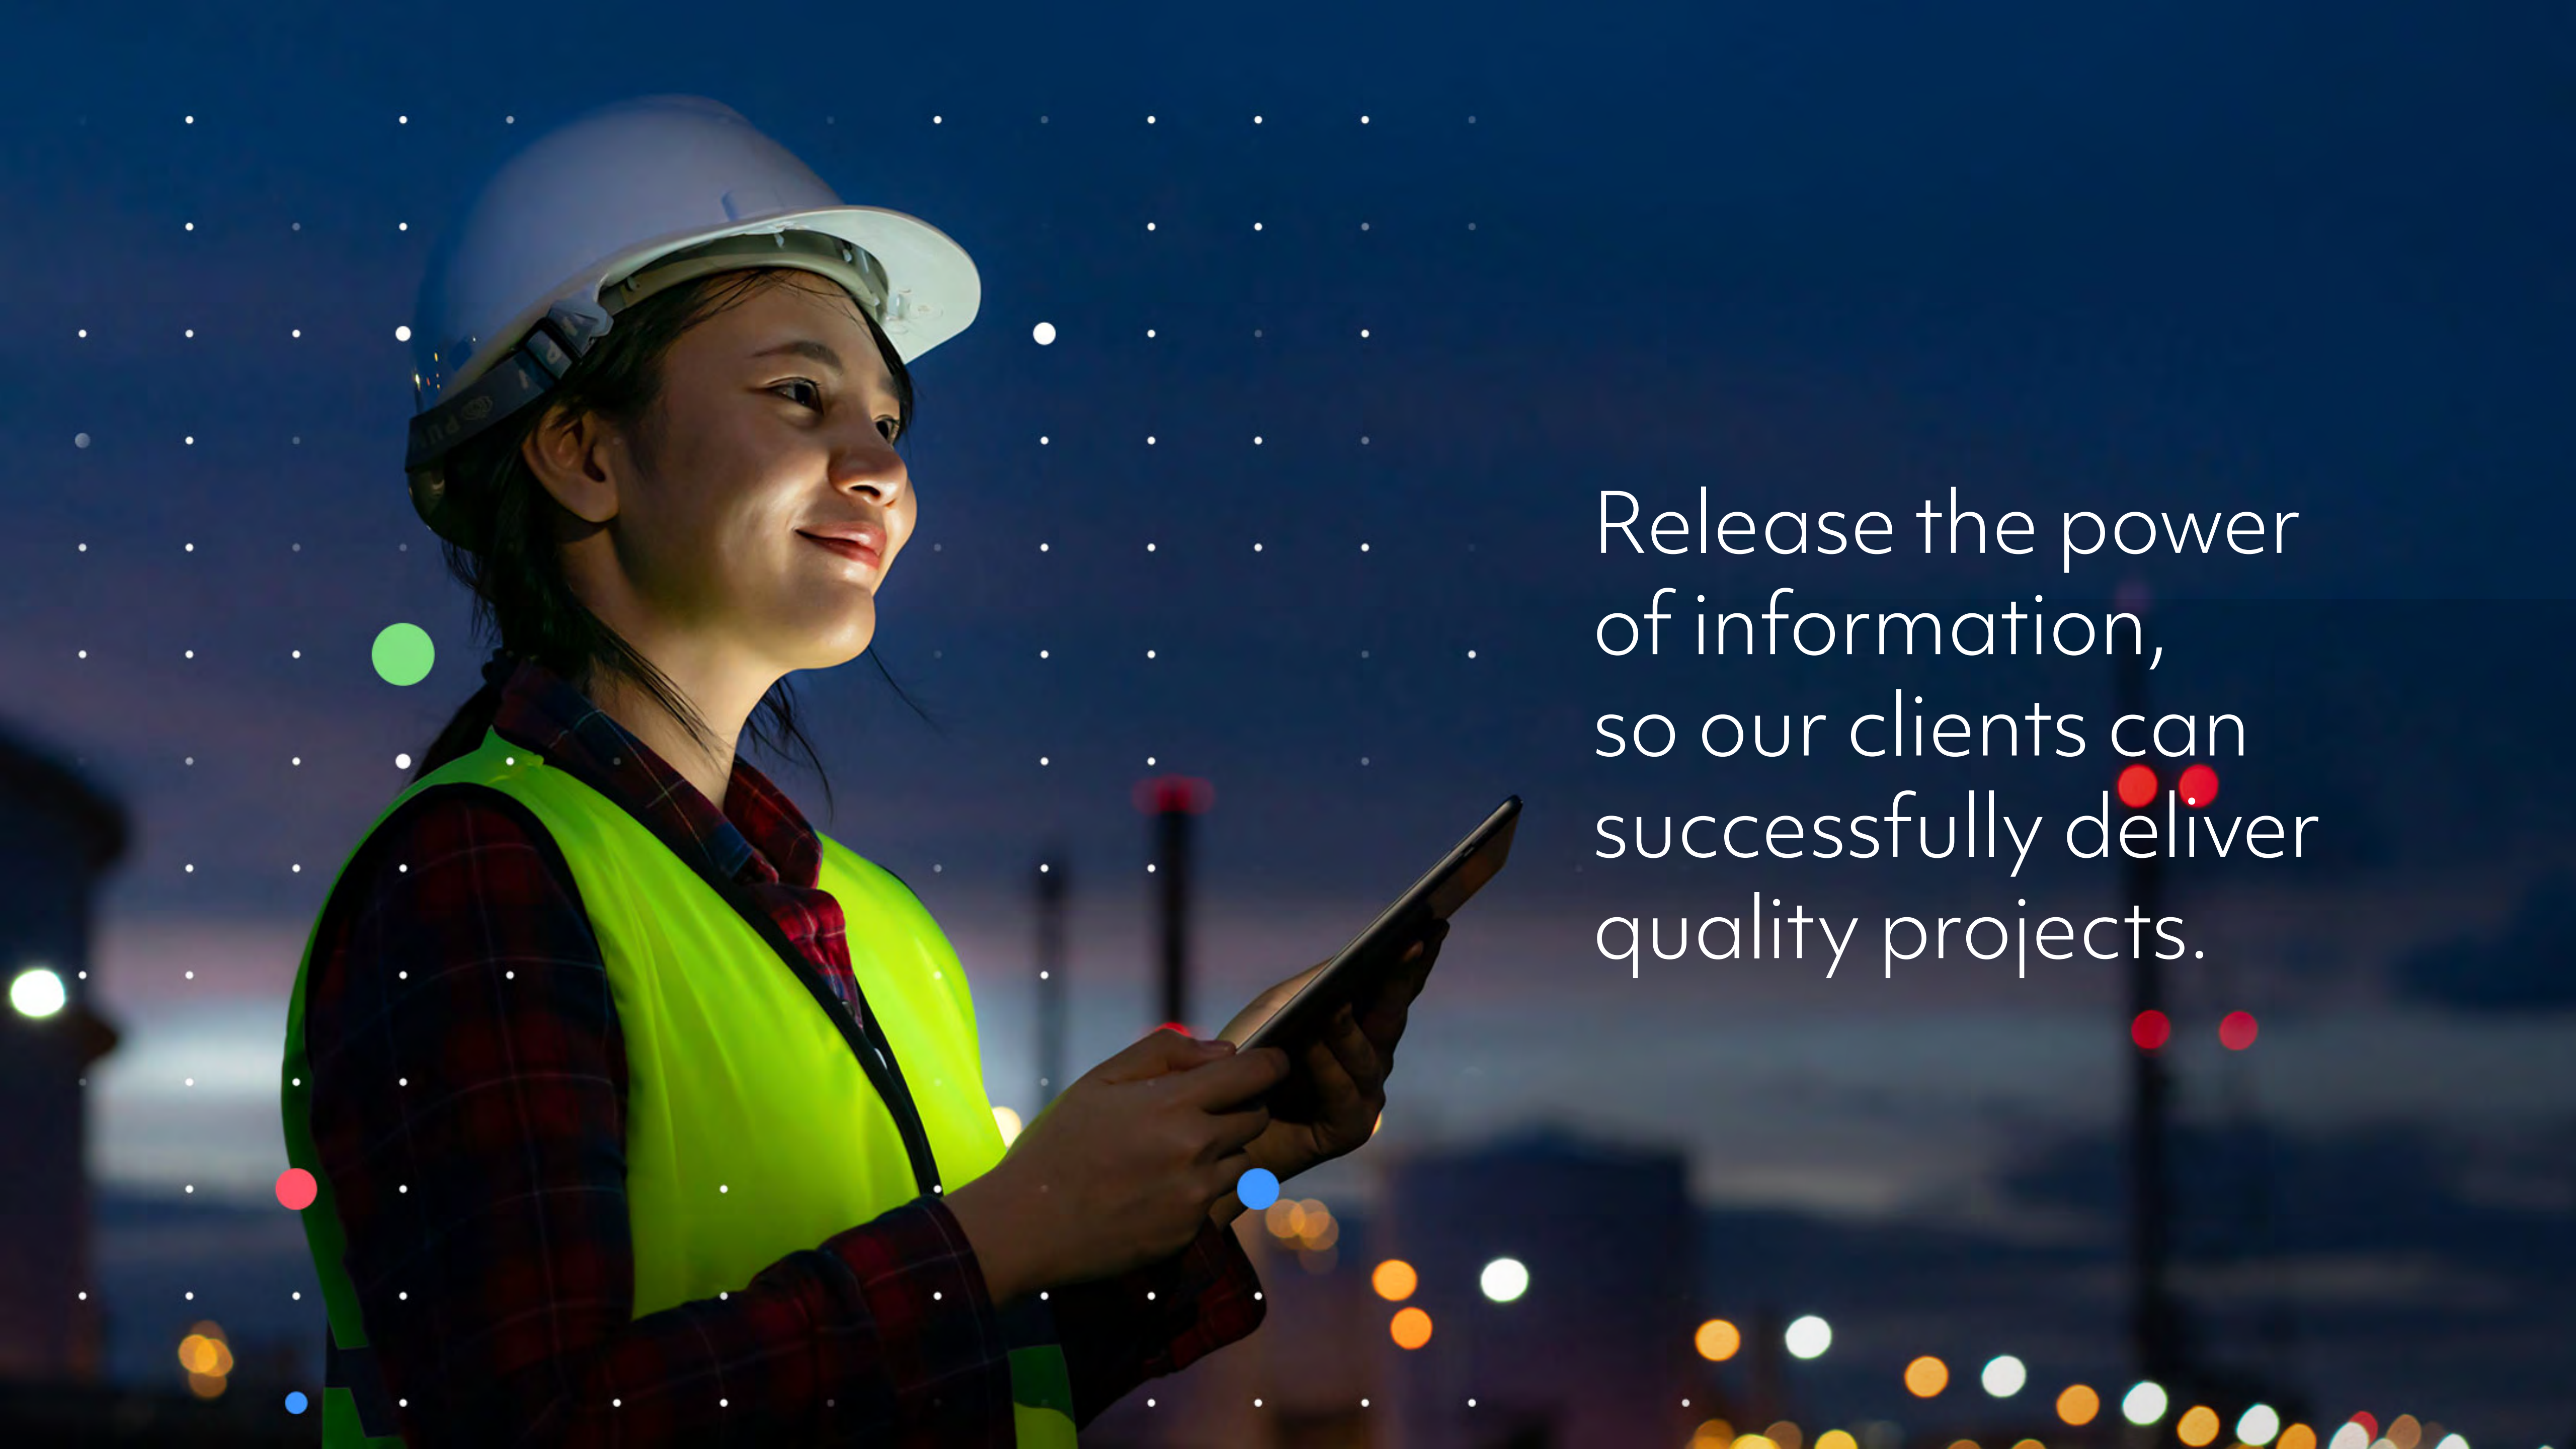

for a wide range of industries. Ascertra solutions integrate with existing systems for accelerated project stand up to quickly ensure the controlled distribution of information, management of asset integrity, design control and configuration management. Real-time analysis ensures accurate, predictive project data to help keep projects on schedule, accurate, and within scope.

Ascertra continues to be the partner of choice because we understand the world of information management for engineering and construction and continue to evolve our solutions for the industry's changing needs.

We're dedicated to continuous improvement and look to always deliver the most innovative solutions to our clients, so they can reduce their information management risk and achieve their business objectives.

Ascertra has sales and distribution locations in Norway, Houston, Calgary, and Kitchener.

Release the power
of information,
so our clients can
successfully deliver
quality projects.

Who we work with

Companies using proven Ascertra solutions

SIEMENS aibel® CAMERON APPLY® SØRCO

Information is the center point of successful capital projects and asset operations.

Our purpose-built document control and interface management software solutions provide teams with information certainty at every stage when engineering, constructing and operating complex assets.
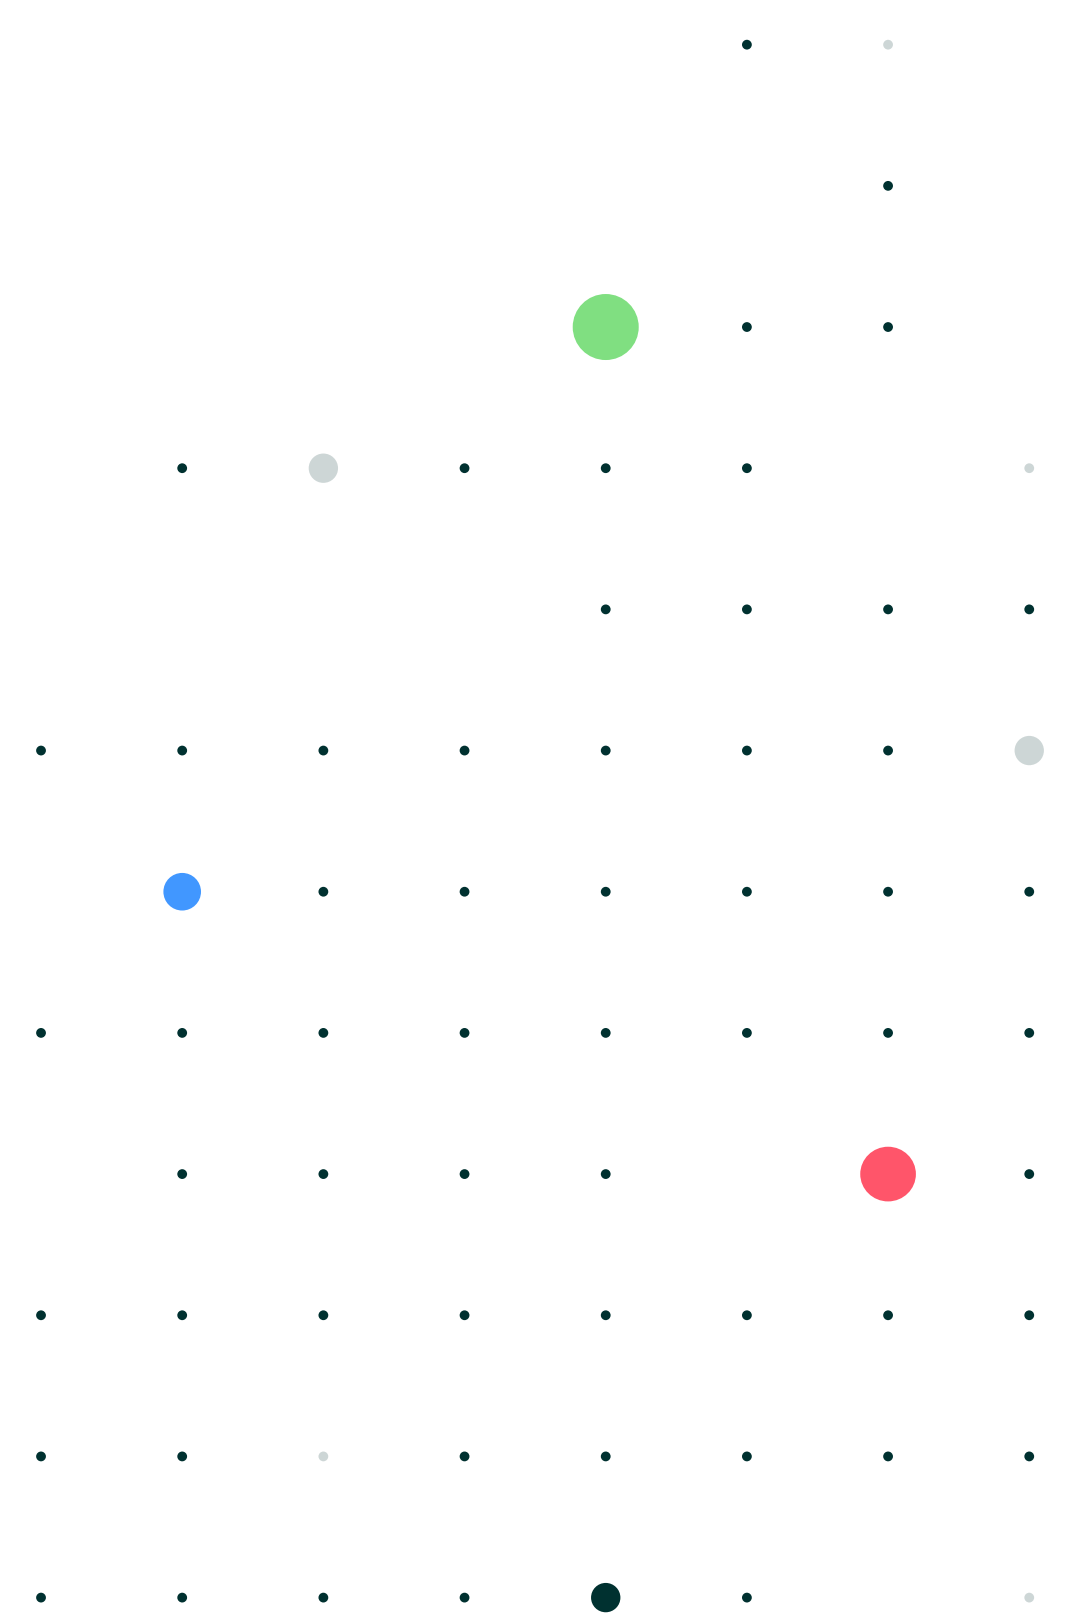

coreworx

Coreworx Interface Connect

Interface management software that keeps delivery teams aligned on scope delineation, requirements and deliverables to ensure successful integrations at shared project interfaces.

### proarc

Proarc Document Control

Engineering document management system (EDMS) that enables controlled collaboration, drives compliance to your document control processes and ensures every team member always has access to accurate information.

Innovative
software keeps
complex capital
projects on time,
on budget,
and teams
aligned.

# Understanding the Value of a Purpose-Built Information Management System:

Securely manage volumes of business-critical documents and information.

Reduce costly errors caused by incorrect information or misalignment (or Empower every team member with the right information and documents at the right time).

Ensure compliance to industry information management practices and regulatory procedures with the flexibility to configure to your requirements.

Identify and mitigate risk with increased visibility to potential issues related to information deliverables and processing.

Reduce claims and resolve disputes with complete audit history of all activities.

Improve team performance with proven industry solutions that have been helping projects manage large volumes of information for more than 40 years.

What sets Ascertra apart?

Industry expertise

We understand how to manage information for highly complex projects that include engineering, construction and asset operations.

Scalability

Our solutions are designed to scale from small to extremely large implementations.

Flexibility

Our solutions are highly configurable software systems that can be configured to meet the unique needs of each project while supporting the overall policies and governance requirements of the entire organization.

Proven implementation

Our solution experts collaborate with you to ensure your implementations achieve quick time-to-value, cross-team adoption, and alignment with long-term business goals.
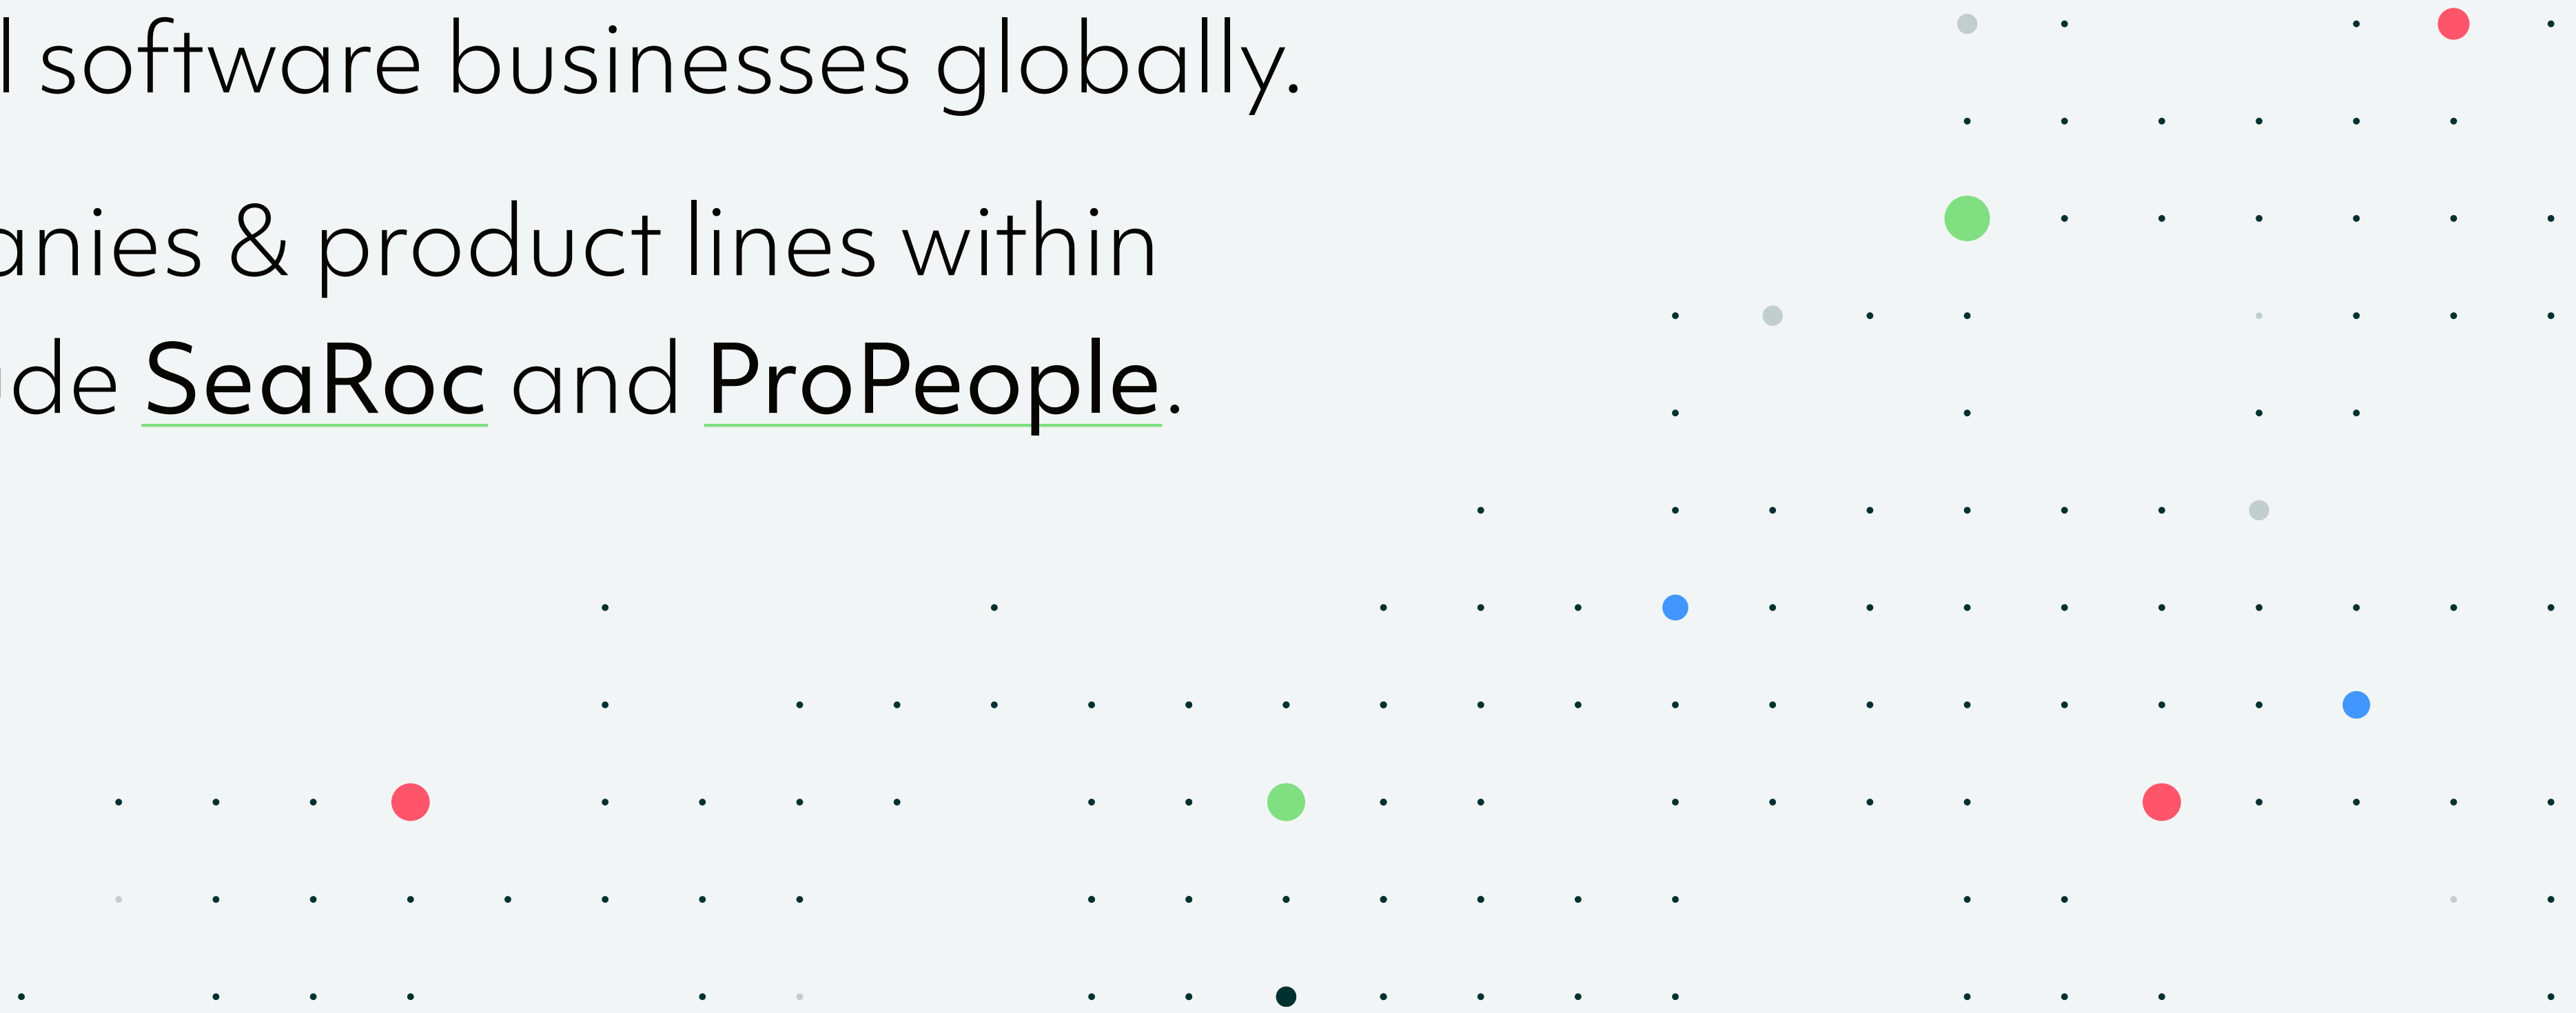

300 Years of experience

300 Active users

20 Countries served

Ascertra helps you design, deliver and operate complex assets.

Ascertra is part of the **Vela Software Group**.

Vela Software, an operating group of **Constellation Software, Inc.**, manages and builds mission-critical software businesses globally.

Related companies & product lines within the group include **SeaRoc** and **ProPeople**.
